St. Paul, 11,900; Union Pacific, 5,490. Depression was quite pronounced in the forenoon stock speculation, the extreme low oints being reached about midday. In the afternoon the trading was firmer and the final prices were at the best of the day and slightly above Saturday's closing figures. The volume of business was moderate and the distribution indifferent, the dealings being almost entirely professional aside from the transactions for foreign account. Per-European orders was a discouraging influence in the early operations, St. Paul bechiefly affected despite an increase Louisville & Nashville, however, the most important decline in this The selling referred to predisposed essional dealers toward the bear side and the engagement of \$1,100,000 in gold for export to Germany by to-morrow's steamer caused them to redouble their efforts, although larger shipments had been expected to be made. The chief points of attack were the industrials and material declines in prices occurred in them on only moderate dealings. In this class the widest fluctuations were recorded and in most instances the early declines were more than recovered. Manhattan gave further reflection of liquidation and on a larger scale than usual recently. The stock declined 2 per cent. at the outset, but the subsequent fluctuations and the engagement of \$1,100,000 in gold for the outset, but the subsequent fluctuations tended upward and a rally of 1½ per cent. from the lowest was made. Sugar declined 1% per cent., being, aside from the general downward drift, especially affected by unfavorable trade conditions. The stock remained at about the lowest point the greater part of the day, but eventually rallied % per cent. to 122. Chicago Gas was somewhat more active than usual and was the

t more active than usual and was the what more active than usual and was the leader of the upward movement in the late dealings, a rally of 1½ per cent. succeeding the early drop of a point. Louisville & Nashville, St. Paul and Missouri Pacific lost important fractions, but in each case the declines were recovered and the last mentioned left off at a net gain of ½ per cent. The general rallying movement was attributed to covering of shorts chiefly and although the market displayed decreased activity on the up grade, some of the improvements established were extensive.

If the negotiations are completed, as they probably will be, it will mean a large crowd of sellers and buyers gathered here for each sale.

WHEAT DROPPED 11-4C

BETTER CROP NEWS AND SMALL DECREASE IN VISIBLE SUPPLY.

Moderate Trade in Chicago Grain Until After the Decline-Provisions Also Fell off.

CHICAGO, May 18 .- Crop movement, Russian shipments and the small decrease in the visible supply caused a sharp decline in wheat to-day. July closed easy at 61%c or 14c below Saturday's close. Corn and oats were dull, but steady and

provisions rather steady in the end. In May wheat there was only a moderate trade early, but later, after the decline, there was more doing, the range for the day being 11/2c. The news at hand outside of advices of late seeding in the Northwest, was bearish and had a very depressing effect on the market. The start showed 1/40 4c loss, and after selling up 4c gradually declined 14c, ralled 4c, changed some and closed as stated. Among the early influences presented, which affected values, were the indifferent cables, Liverpool coming steady and unchanged and the liberal Northwestern receipts. Early advices regarding the world's shipments reported the same large, and this was quite a factor, private advices making the Brack sea shipments 5,064,000 bu and the total 8,700,000 bu. New York wired that \$1,100,000 gold had been engaged for shipment to-morrow. The small decrease in the visible added considerable to the weakness. The decrease was larger at Duluth than expected, but not as large as looked for on the lakes. There was an increase on ocean passage. Exports, too, were small and disappointing. Weather indications were more favorable. There was a fair speculative trade in corn, the market covering but 1/4c range. Little change occurred in values, the final figures showing but a trifle decline. The market acted a little as if oversold the lib. market acted a little as if oversold, the liberal receipts and decline in wheat not hav-ing any particular influence on prices. In May oats there was enough selling pressure to force prices down 1/40%c, and the close was at the bottom with a loss of 1/4 4c. At the decline there was enough buying to prevent a further break, and the offerings were readily absorbed.

A higher market for hogs started some

products assumed a firm appearance. When wheat began to show decided weakness, however, the early buyers of provisions became sellers, and buyers at the same time were discovered to be scarce. In the end pork left off 7½c lower and lard and ribs each .02½c down, compared with Saturday's Estimated receipts for to-morrow-Wheat, 17 cars; corn, 460 cars; oats, 330 cars; hogs,

Foreign Crop Statistics. WASHINGTON, May 18.-The foreign statistics gathered by the Agricultural De-

partment show the crop conditions throughout the year. The summary follows: Great Britain—The crop outlook every-where is good and promises a harvest about two weeks earlier than usual. This would diminish the imports for the remainder of the current cereal year by about 5,000,000

France-With normal weather until harves the wheat crop will more than suffice for home requirements. A surplus for export is confidently predicted by French agricultural journals and statisticians, some expecting that it will amount to 40,000,000 bushels. This quantity would affect prices, especially if the French government should pay a bounty on exports. Austria-Hungary—The weather has been favorable and the crops promise well.

Roumania—Cold weather in April retarded the crops, but the outlook is generally

Russia—Excellent prospects of a crop above the average in quantity and quality are generally reported. The unfavorable March weather in the south is found to have done no serious damage. Spring sowings have been completed under good conditions.

STREET GANG SCANDAL CROOKED PAY ROLLS IN COMMIS-

SIONER HERPICK'S DEPARTMENT. Foreman Collier Arrested for Embesziement-An Office Where Democrat-

ic Heelers Get Their Reward. Thomas Collier, a foreman on a streetrepair gang in the employ of the city, was arrested yesterday on the charge of embezzlement. The charge was preferred by Street Commissioner Herpick, after an investigation held in the Mayor's office. It seems that John Keefe, one of the laborers under Collier, informed Mayor Taggart that his name had been used to "pad" the pay

roll, and that he had divided the money thus received with Collier. Keefe was called to the Mayor's office yesterday morning and he made a full confession of his part in the transaction and put last week he was sick and did not work for three and a half days; that he was placed on the pay roll for a full week's time, and when he drew the \$4.90 which he had not

earned he gave Collier \$1.50. Information was received that William Lyons was also used as a means of drawing upon the city treasury, and he was sent for. He denied all charges, however. The street commissioner believes he has three or four other instances where Collier padded the rolls in this manner, and that the evidence will be forthcoming at the proper time to convict him. Instances during the past three weeks are cited, though without any specific statement as to the amount of the pecula-

As soon as the investigation had been concluded the street commissioner went to Jus-tice Nickerson's court and made affidavit against Collier, and the latter was placed under arrest. He asked that his preliminary hearing be postponed until Thursday and his bond was fixed at \$500, in default of which he went to jail. Coller was seen at the jail during the afternoon and pronounced the whole matter a put-up job to get him into trouble. "Regarding the case of John Keefe," he said, "I admit that he did not work on the three and a half days for which work on the three and a half days for which he was paid, but placing him upon the roll was a mistake. Any man is liable to make a mistake. I handle from thirty to sixty men and it is not wonderful that I should carry one of them on the roll by mistake while he was sick. I don't know what Lyons claims, but if he says I used his name when he did not work he lied. I can prove that I have refused to do the very thing I am charged with doing. Only a few days ago Bill Kelly came to me and said he wanted to lay off a day and asked me not to dock him. I refused to entertain his proposition. He offered me 50 cents and I still refused. Simon Wiseman, a teamster, was fused. Simon Wiseman, a teamster, was standing by and heard the interview." Collier is a married man, with a wife and two children and his mother depending upon

NO CHECKING SYSTEM. The fact that it was possible for a person occupying the subordinate position of that held by Collier to open such a pipe line as he may have opened to the city treasury was commented on with considerable surprise by persons who have been familiar with the affairs of the city during the past few years. It seemed strange that a foreman of a street-repair gang should have ever. At night a number of his compatible opportunity to make out a pay roll of his years of dissipation gained admit which should go to the controller for pay-......\$3.30@3.40 which should go to the controller for payment without any sort of auditing or checking by the street commissioner that would detect padding. Under an ordinarily safe and coservative method of business, it was believed, the street commissioner should have discovered any fraud that might have been perpetrated.
Under the Denny administration there were established and enforced civil-service rules,

faithfulness of the city employes. Ine de-struction of these rules was considered as a possible cause of the embezzlement which is charged against Collier. Under the rule of Mayor Taggart and his appointees there is no examination of applicants for positions in the city work. The only requirement is that the man is a good Democrat, and the more unsavory his reputation as a ward heeler the stronger seem his chances of appointthe stronger seem his chances of appointment. The class of men, therefore, cannot be expected to be the highest, and it ought to be expected that a closer watch would be kept of their movements and official conduct. That this has not been done is apparent by the loose methods which make it possible for a street-repair foreman to return whatever pay roll he sees fit without any possibility of discovery by his superior.

The charges against Collier were made by the man who claims that he drew more money than he was entitled to. The alleged embezzlement was not discovered by his superiors. Collier admits that the man did not earn the money he was paid, and, taking arn the money he was paid, and, taking is view of the case, that the payment was made by mistake, there is exhibited a de-moralization in the business affairs of the city which is shocking to people who voted for a "business" administration.

The Board of Works yesterday received by express from New Orleans a sample of the yellow-pine creosoted block which is used for paving some of the streets of that city. The block was sent by T. O'Neil, auditor of the New Orleans Gas Light Company, and, accompanying it, was a statement that the block was taken from the entrance to the company's yards at a place where the trame was as heavy as on any street in the city. The block was placed in the street in 187 and shows but little wear after twenty-four years of steady usage. Members of the board were delighted with the statement accomm panying the block.

TO INVESTIGATE THIS DEATH.

John Murphy, an Anderson Stone Mason, Found Dead in Bed.

John Murphy, a stone mason, who recently came here from Anderson, Ind., was found dead in his room at Powers's Hotel, corner of Alabama and Washington streets, yesterday morning. His body was removed to the morgue of Collier & Murphy. Persons at the hotel say that Murphy took a room there last week. Saturday night he was found at the foot of the stairs, unable to walk. He complained of pains in his stomach. Simple remedies were given him and that night fellow-stone masons sat up with him. Sunday he was no better, and a physician from the City Dispensary was summoned. The physician believed, from the symptoms, that Murphy was suffering from colic and prescribed for him, but was not called in again. His friends remained with him until after supper Sunday night, when he was left alone. Nothing more was heard of Murphy until he was found dead. Coroner Castor was notified and had a talk with the dispensary physician, who does not believe that Murphy was ill enough to die. The circumstances surrounding his death are regarded as mysterious enough to call for an investigation, and Coroner Castor will hold a post-mortem examination this morning.

John Murphy left a wife and family at Anderson. Collier & Murphy telephoned to them yesterday and received word that friends would have the body taken to Anderson for burial. The dead man was about forty-five years old. there last week. Saturday night he was

These two jurisdictions were entirely distinct from each other their management. At the last Grand Council of the two jurisdictions delegates we elected to the Supreme Council, which was held a year age in Denver These distances. held a year ago in Denver. These delegated were given full power to act in any way the good of the order, and it was decided that the old system should be abolished a that seven jurisdictions, all under one appreciately preme jurisdiction, should be established. The new order of things begins to-day, and the first officers for the new jurisdictions will be called to order by C. A. Korbly, district deputy supreme president.

LAST NIGHT'S RAIN GENERAL

The total rainfall yesterday was slightly to one and three-tenths inches, and for the year it is six and seven-tenths inches. T average rainfall for May is 4.13 inches, and for the first five months 10,02 inches. The rains of the last few days will prove of inbeen immense. As it is the hay crop will be good, and corn will be given a good star it so badly needs. The rains, until las night, have not been general over the State but that of last night probably covered t
